Avoid fees! Here are a few tips:

Know your ATMs

Through the CO-OP Network, you have fee-free access to **over 30,000** ATMs nationally. Make sure you know where those ATMs are. Find the CO-OP ATMs near your home, work and favorite shopping destinations so you don't have to resort to an out-of-network ATM when you need cash. Find the CO-OP ATM nearest you by logging on to the website, co-opnetwork.org

Point-of-Sale transactions and cash back

Many merchants, like grocery and convenience stores, will offer you the ability to get cash back when completing a point-of-sale purchase with your PIN. You will be debited for your original purchase amount plus the amount of cash you received.

Be kind to your card

Reduce your chances for needing a replacement card by storing your card safely in your wallet or purse. Handling your card with care can minimize wear and tear and reduce the chances of your card being lost or stolen.

It's all about balance

Avoid trips to the ATM to look up your card balance. Sign up for Online Banking to monitor your transaction history and your available balance from wherever you have internet access.
